

Other Kinds of Data

Suppose we want to represent snakes:

- name
- weight
- favorite food

What kind of data is appropriate?

Not **num**, **bool**, **string**, **image**, or **posn**...

Data Definitions and `define-struct`

Here's what we'd like:

A `snake` is

```
(make-snake string num string)
```

... but `make-snake` is not built into DrRacket

We can tell DrRacket about `snake`:

```
(define-struct snake (name weight food))
```

Creates the following:

- `make-snake`
- `snake-name`
- `snake-weight`
- `snake-food`

Data Definitions and `define-struct`

Here's what we'd like:

A `snake` is

```
(make-snake string num string)
```

... but `make-snake` is not built into DrRacket

We can tell DrRacket about `snake`:

```
(define-struct snake (name weight food))
```

Creates the following:

```
(snake-name (make-snake X Y Z)) → X
```

```
(snake-weight (make-snake X Y Z)) → Y
```

```
(snake-food (make-snake X Y Z)) → Z
```

Values vs. define-struct

```
(make-snake "Slinky" 10 "rats")
```

```
(make-snake "Slimey" 8 "pudding")
```

Values vs. define-struct

```
(define-struct snake (name weight food))
```

Values vs. define-struct

```
(define-struct snake (name weight food))
```

```
(make-snake "Slinky" 10 "rats")
```

```
(make-snake "Slimey" 8 "pudding")
```

```
(define-struct posn (x y))
```

```
(make-posn 3 4)
```

```
(make-posn 8 -2)
```
