Implement the function **cancel**, which takes an image and adds a red X over it

Design Recipe I

Data

- Understand the input data: `num`, `bool`, `string`, or `image`

Contract, Purpose, and Header

- Describe (but don't write) the function

Examples

- Show what will happen when the function is done

Body

- The most creative step: implement the function body

Test

- Run the examples

Implement the function `cancel`, which takes an image and adds a red X over it
