

Project P4: Project Fourth Step

CS 6640
Fall 2020

Assigned: 15 September 2020

Due: 24 November 2020 (handin all work on CADE)

Project

Discuss how techniques in Chapters 9 and 10 of the text can be applied to the problem, what functions were developed to try them out, and the results of using them. Report experiments performed to explore possible approaches. The work will be evaluated based on the thoughtfulness of the approach and the care with which it is applied. Issues to be considered include the exploitation of features and segmentation techniques to the project.

P4 Handin: Handin (on the CADE):

- Report (PDF)
- Matlab Code

Provide enough detail and everything necessary to duplicate your results.
