Contents

<i>A. Knoll, G. Bekey, T.C. Henderson</i> Cui bono robo sapiens? (Editorial)	73
<i>T. Furuta, T. Tawara, Y. Okumura, M. Shimizu and K. Tomiyama</i> Design and construction of a series of compact humanoid robots and development of biped walk control strategies	81
<i>Y. Nakamura, H. Hirukawa, K. Yamane, S. Kajita, K. Fujiwara, F. Kanehiro, F. Nagashima, Y. Murase and M. Inaba</i> Humanoid robot simulator for the METI HRP Project	101
<i>A. Ude, T. Shibata and C.G. Atkeson</i> Real-time visual system for interaction with a humanoid robot	115
<i>A. Stoica</i> Robot fostering techniques for sensory-motor development of humanoid robots	127
<i>A. Billard and M.J. Matarić</i> Learning human arm movements by imitation: Evaluation of a biologically inspired connectionist architecture	145
<i>G. Cheng, A. Nagakubo and Y. Kuniyoshi</i> Continuous humanoid interaction: An integrated perspective — gaining adaptivity, redundancy, flexibility — in one	161
<i>M. Asada, K.F. MacDorman, H. Ishiguro and Y. Kuniyoshi</i> Cognitive developmental robotics as a new paradigm for the design of humanoid robots	185
<i>J. Coelho, J. Piater and R. Grupen</i> Developing haptic and visual perceptual categories for reaching and grasping with a humanoid robot	195
